

A Note from our Counselors

It is a pleasure to be at Hearne Elementary as the school counselors! The counseling program at Hearne Elementary is designed to reach all of the student population and to help support the social, emotional, physical and academic needs of students. This year, one way that we'll be working with students is by leading classroom guidance lessons. These lessons vary among the grade levels, but often include life skills such as problem-solving, communication, making friends, resolving conflicts and community-building. Small counseling groups are also offered throughout the year focusing on a variety of topics. We are also available to meet with students on an individual basis if a need arises. In addition, We can be a resource to families with such things as food, clothing, outside therapy or other basic needs. If you have any questions about the counseling program, or if you'd like to refer your child, please feel free to contact us! We look forward to working with your child this year!

Sincerely,
Gala Brannon-Jacobs and Lilian Guzman
