

Dear Alief ISD Educator,

Great news from **Schoolology**, our award-winning learning management system! Schoolology is updating its interface and workflows to make it even easier to use — with better accessibility and a more modern experience. The new experience includes a new top navigation and footer, and removes the left navigation from the homepage, making it:

- Easier to access all of your tools throughout Schoolology
- Simpler for instructors and administrators to get things done with a more streamlined workflow
- Better for younger learners, with a visual card layout for courses and groups

If you would like to get a sneak peak of the changes you can expect from the new site navigation, please read the [“What’s Changing with Schoolology’s New Site Navigation”](#) article!

**So you are aware, Alief ISD will be officially enabling the New Site Navigation on September 10, 2018.** Since Schoolology is *already* available to all Alief teachers and students, you will benefit from this updated user experience when utilizing Schoolology with your students in the 2018-19 school year!

We think you will find that Schoolology’s new interface is intuitive and user-friendly. Let’s *advance what’s possible* in Alief ISD with the new and improved Schoolology platform!

Sincerely,  
Alief Schoolology Team
