Board of Trustees
Alief Independent School District
Harris County, Texas

Dear Board Members:

State law requires that all general-purpose local governments publish within 150 days of the close of each fiscal year a complete set of financial statements presented in conformity with generally accepted accounting principals (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue the comprehensive annual financial report of the Alief Independent School District for the fiscal year ended August 31, 2007.

This report consists of management’s representations concerning the finances of the District. Consequently, management assumes full responsibility for the completeness and reliability of all of the information presented in this report. In order to provide a reasonable basis for making those representations, management of the District has established a comprehensive internal control framework that is designed to protect the government’s assets from loss, theft, or misuse. Additionally, the internal control framework is designed to compile sufficient reliable information for the preparation of the District’s financial statements in conformity with GAAP. Because the costs of internal controls should not outweigh their benefits, the District’s comprehensive framework of internal controls has been designed to provide reasonable assurance rather than absolute assurance that the financial statements will be free from material misstatement. To the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The financial statements of the District have been audited by Null-Lairson, P.C., a firm of licensed certified public accountants. The goal of the independent audit is to provide reasonable assurance that the financial statements of the District for the fiscal year ended August 31, 2007 are free of material misstatement. The independent audit involves examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principals used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditors concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the District’s financial statements for the fiscal year ended August 31, 2007 are fairly presented in conformity with GAAP. The independent auditors’ report is presented as the first component of the financial section of this report.

The independent audit of the financial statements is part of a broader, federally mandated “Single Audit” designed to meet the special needs of federal grantor agencies. The standards governing Single Audit engagements require the independent auditor to report not only the fair presentation of the financial statements, but also on the audited government’s internal controls and compliance with legal requirements, with special emphasis on internal controls and legal requirements involving the administration of federal awards. These reports are available in the District’s separately issued Single Audit Report.

GAAP require that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The District's MD&A can be found immediately following the report of the independent auditors.

Profile of the District

The Alief Independent School District, established in 1917, encompasses 36.6 square miles in southwest Harris County. The District is an independent political subdivision of the State of Texas governed by an elected board of trustees. The board is elected to staggered three-year terms by the District's residents. The District is located primarily within the City of Houston and totally within Harris County, Texas. The Alief Independent School District has a population of approximately 260,000 and employs approximately 6,350 employees. These employees adequately provide educational services for the 45,740 students enrolled in the Alief Independent School District. The twenty-four elementary schools (pre-kindergarten through fourth or fifth grade), six intermediate schools (fifth and sixth grades), six middle schools (sixth or seventh grade through eighth grade), two ninth grade centers, and four high schools (ninth or tenth grade through twelfth grade) are accredited by the Southern Association of Colleges and Schools and the Texas Education Agency.

The Alief Independent School District provides a full range of educational services appropriate to grade levels pre-kindergarten through twelfth grade. These include regular and enriched academic education, special education for handicapped students, occupational education, and educational services for those with limited English proficiency. These basic programs are supplemented by a wide variety of offerings in fine arts, athletics, and other extracurricular programs.

Budgeting

The annual budget serves as the foundation for the District's financial planning and control. The budget process begins in January when the Long-Range Plan is presented to the Board of Trustees. The enrollment projections contained in this plan form the basis for significant budgetary decisions including per pupil allocations to each campus, instructional staffing allocations, and other required service levels. Once the Long-Range Plan is approved, the Board of Trustees can begin discussions concerning budget strategies and priorities, and establish the budget calendar. Personnel units are allocated to each campus based on projected student enrollment following state mandated ratios, as applicable. Each campus receives a basic allotment per student to be used for supplies, materials, equipment, staff development and other appropriate instructional costs. Decisions concerning utilization of this allocation are made by the site-based decision making teams. Budgets for non-campus units are developed by department heads and reviewed by the Budget Committee. Following the budget development process, consolidated budgetary information is presented to the Board of Trustees in workshops and regular meetings. The proposed budget must be prepared by August 20th for a September 1st fiscal year start date. The Board President must call a board meeting for the purpose of discussing and adopting the budget and the tax rate. A notice of this meeting is required to be published at least 10 days, but not more than 30 days before the public meeting. Budget-to-actual comparisons are provided in this report for each individual governmental fund or program for which an appropriated annual budget has been adopted.

The budget may be amended during the year to address unanticipated or changing needs of the District. Changes to functional expenditure categories require Board of Trustee approval. However, budget changes not requiring an increase in total appropriations and within functional categories may be approved by management without Board approval.

Factors Affecting Financial Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the District operates.

Local Economy

The local economy is based predominantly on commercial and financial activities. Shell Development Company's Westhollow Research Center is situated in the western portion of the District. Chevron Chemical is also located in the District, as is the world headquarters of Western Geophysical, a division of Baker Hughes. The area economy remains strong, with property values increasing over 4% for each of the last five years.

The local economy was greatly impacted by the natural disasters of hurricanes Katrina and Rita in 2005. Following the hurricanes, thousands of families relocated to the Houston area. Evacuee enrollment grew throughout the fall and peaked at just over 3,000 in late January 2006. The 2005-06 year ended with approximately 2,500 evacuee students in attendance. Developing enrollment estimates for 2006-07 was complicated by this influx of students as significant uncertainty existed as whether or not they would remain in Alief for the new school year. After much analysis, the projection was set at 46,875 for budget planning. Actual October 2006 enrollment was 45,740, a much more dramatic decline than was expected. The District monitors this and other indicators of student growth as future financial decisions are made.

State Funding

The State of Texas provides funding for public education via a financing formula which weights student attendance levels, property value per student, the District's tax effort, and regional variations in payroll and other costs. The District is considered a "property-poor" school district because the assessed value of property per student is lower than the statewide average. The statewide taxable value per student for 2006-07 was \$305,208, while the comparable value for the District was \$215,383.

Statewide, many districts were taxing at \$1.50 tax cap for maintenance and operations purposes in 2005. The Legislature passed House Bill 1 (H.B. 1) mandating districts to compress tax rates by 88.67% of the 2005 maintenance and operations tax rates (\$1.33 for Alief) for 2006. Districts were then able to assess an additional four cents above the compressed rate for enrichment without a voter election. The State holds each district harmless by capping the target revenue as combined state and local revenue per weighted student the district had in 2005-06, or would have had in 2006-07 under old law. This adjustment to the target essentially holds the District's combined state and local revenue at the amount received in 2005-06 per weighted student level.

Cash Management

Cash available in excess of cash requirements was invested in the one of three investment pools used by the District and government agency securities. The District participates in Texpool, the Local Government Investment Cooperative (LOGIC), and Lone Star investment pools. The District's investment policy is to minimize risk while maintaining a competitive yield on its portfolio. The District's deposits were entirely covered by Federal Deposit Insurance Corporation (FDIC) insurance and pledged collateral for the year ended August 31, 2007.

Risk Management

The District's risk management program encompasses various means of protecting the District against loss. District instructional facilities range in age from forty to less than one year. Property and casualty insurance on all facilities, fixtures, and equipment is provided by commercial carriers and liability insurance coverage is provided by participation in a public entity risk pool administered by the Texas Political Subdivision. The Risk Management Department of the District strives to ensure the safety and health of the students and employees through its accident prevention programs, safety education programs, and safety inspections.

In addition, the District strives to maintain employee benefit programs designed to retain and attract qualified personnel. To achieve this, the District operates a self-funded health insurance program and is covered by an excess loss insurance policy for claims exceeding a specified limit. Various types of insurance coverages are made available to employees. Portions of the coverages available, such as medical and life insurance, are partially paid by the District. The District also operates a self-funded workers compensation program with an emphasis on cost control of claims.

Major Initiatives and Accomplishments

In September 2003, the voters in the Alief Independent School District approved a \$175 million bond referendum. Currently, \$99.1 million of these bonds have been issued with the remaining authorized amount scheduled to be issued in various increments over the next four years. The planned use of these funds currently includes construction of elementary school#25, intermediate school #7, and middle school #7. However, these plans may be revised due to current enrollment trends. The proceeds will also be used for renovations, additions, and maintenance to existing campuses.

Implementation of the Long-Range Technology Plan is still in effect, which will enable children to experience hands on learning utilizing leading edge technologies. New computer labs are being installed to improve academic success through computer-assisted learning. The success of these and many other programs is evident in the continued improvement in student performance on the Texas Assessment of Knowledge and Skills (TAKS) Test.

The 2006-07 financial structure of the Alief Independent School District provided support to work toward or accomplish the following goals:

1. Provided competitive salary and benefit increases to District employees. The Texas Legislature mandated a salary increase of \$2,500 plus a step increase for teachers, nurses, librarians, and counselors which averaged 5.3% for those groups. \$500 of this \$2,500 was from the \$500 State insurance supplement that was being eliminated and being converted to salary. The Alief Board voted to approve the same percentage increase for all other personnel.
2. Maintained a fiscally responsible tax rate. Even though H.B.1 mandated districts to compress the 2005 tax rate for 2006, the maximum rate remained at \$1.50. Districts may increase rates \$0.04 above the compression rate without voter approval. The administration recommended and the Board approved using \$0.04 available and the tax rate was set at \$1.37 for 2006-07 after the actual enrollment numbers were used to modify the state aid estimates. While the debt service tax rate remained the same, the total tax rate has decreased by \$0.13.
3. Structured fiscally responsible debt retirement schedules. Alief continues to retire debt at an aggressive pace. Within the next 10 years, Alief will retire approximately 73.56% of the currently issued debt compared to the state average of 38.75%.

Awards and Acknowledgements

The Association of School Business Officials International (ASBO) awarded a Certificate of Excellence in Financial Reporting to the Alief Independent School District for its Comprehensive Annual Financial Report for the fiscal year ended August 31, 2006. We believe that our current report continues to conform to the high standards of the certificate of excellence program, and we are submitting it to ASBO.

In addition, the Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to Alief Independent School District for its Comprehensive Annual Financial Report for the fiscal year ended August 31, 2006.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized Comprehensive Annual Financial Report, whose contents conform to program standards. Such reports must satisfy both accounting principles generally accepted in the United States of America and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to the GFOA.

The District also received the GFOA's Distinguished Budget Presentation Award and the ASBO's Meritorious Budget Award for its annual budget document. In order to qualify for these budget awards the budget document was judged to be proficient in several categories as specified by these two organizations.

Awards and Acknowledgements (continued)

The financial management staff of the Alief Independent School District wishes to express its appreciation to the Board of Trustees for their concern in providing fiscal accountability to the patrons of the District and thereby contributing their full support in the development of one of the best educational financial operations within the State of Texas. The preparation of this report could not have been accomplished without the dedicated services of the District's Accounting Department as well as the technical support provided by the independent auditing firm of Null-Lairson, P.C. Sincere appreciation is extended to those personnel who assisted and contributed to the preparation of the Comprehensive Annual Financial Report.

Sincerely,

Dr. Louis B. Stoerner
Superintendent

Mr. Charles Woods
Deputy Superintendent of Business

Ms. Deanna Wentz
Assistant Superintendent of Finance

**ASSOCIATION OF SCHOOL BUSINESS OFFICIALS
INTERNATIONAL**

This Certificate of Excellence in Financial Reporting is presented to

ALIEF INDEPENDENT SCHOOL DISTRICT

For its Comprehensive Annual Financial Report (CAFR)

For the Fiscal Year Ended August 31, 2006

Upon recommendation of the Association's Panel of Review which has judged that the Report substantially conforms to principles and standards of ASBO's Certificate of Excellence Program

President

Executive Director

Certificate of Achievement for Excellence in Financial Reporting

Presented to

Alief Independent School
District, Texas

For its Comprehensive Annual
Financial Report
for the Fiscal Year Ended
August 31, 2006

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

Charles S. Cox

Independent Auditors' Report

To the Board of Trustees
Alief Independent School District
Houston, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of Alief Independent School District (the "District") as of and for the year ended August 31, 2007, which collectively comprise the District's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the District's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the District as of August 31, 2007, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated January 15, 2008 on our consideration of the District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Independent Auditors' Report
Alief Independent School District
Page 2

The management's discussion and analysis and budgetary comparison information on pages 13 to 22 and pages 52 through 54, respectively, are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The other supplementary information listed in the table of contents includes combining and individual fund financial statements and compliance schedules required by the Texas Education Agency that are presented for the purpose of additional analysis and are not a required part of the basic financial statements. The combining and individual fund financial statements have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly presented in all material respects in relation to the basic financial statements taken as a whole. We have applied certain limited procedures to the compliance schedules required by the Texas Education Agency, which consisted principally of inquiries of management regarding the methods of measurement and presentation of this information. However, we did not audit this information and express no opinion on it.

The Introductory Section and Statistical Section listed in the foregoing table of contents have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Nell Garrison, P. e.

Houston, Texas
January 15, 2008

Management's Discussion and Analysis

In this section of the comprehensive annual financial report, we offer readers of the District's financial statements a narrative overview and analysis of the financial activities of the District for the fiscal year ended August 31, 2007. Please read it in conjunction with the independent auditors' report and the District's financial statements, which follow this section.

Financial Highlights

- The assets of the District exceeded its liabilities at the close of the fiscal year by \$252,599,058 (net assets). Of this amount, \$87,394,161 (unrestricted net assets) may be used to meet the District's ongoing obligations.
- The District's net assets increased \$15,324,557 as a result of this year's operations.
- The District's governmental funds reported combined ending fund balances of \$111,157,290. Approximately 64% of this total amount, \$71,148,277, is available for spending at the government's discretion (unreserved, undesignated fund balance).
- The combined ending fund balances for the District's governmental funds increased \$2,508,211 due primarily to an increase in the fund balance of the general fund.
- The General Fund ended the year with an unreserved, undesignated fund balance of \$71,148,277 or 23% of the total general fund expenditures.

Overview of the Financial Statements

This annual report consists of a series of financial statements plus additional supplemental information as required by its state oversight agency, the Texas Education Agency. The District's basic financial statements consist of three sections: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the basic financial statements. The following sections describe the measurement focus of the two types of statements and the significant differences in the information they provide.

Government-wide Financial Statements

The focus of government-wide financial statements is on the overall financial position and activities of the District. The District's government-wide financial statements include the statement of net assets and the statement of activities (on pages 23 and 24), which are prepared using accounting principles that are similar to commercial enterprises. These statements provide information about the activities of the District as a whole and present a longer-term view of the District's property and debt obligations and other financial matters.

The statement of net assets includes all the District's assets and liabilities at the end of the year, with the difference between the two reported as *net assets*. This difference is similar to the total owners' equity presented by a commercial enterprise. All the District's assets are reported, whether they serve the current year or future years. Liabilities are considered regardless of whether they must be paid in the current or future years. Although the purpose of the District is not to accumulate net assets, in general, as the amount increases, it may indicate that the financial position of the District is improving over time. To fully assess the overall health of the District, however, you should consider other factors as well, such as changes in the District's average daily attendance or its property tax base and the condition of the District's facilities.

Management's Discussion and Analysis (continued)

The purpose of the statement of activities is to present the revenues and expenses of the District. Again, the items presented on the statement of activities are measured in a manner similar to the approach used by a commercial enterprise in that revenues are recognized when earned or established criteria are satisfied, and expenses are reported when incurred by the District. Thus, revenues are reported even when they may not be collected for several months or years after the end of the accounting period, and expenses are recorded even though they may not have used cash during the current period.

The District's revenues are divided into those provided by outside parties who share the costs of some programs, such as tuition received for summer school and grants provided by the U.S. Department of Education to assist children with disabilities or from disadvantaged backgrounds, and revenues provided by the taxpayers or by TEA in the equalization funding processes (general revenues). Although the statement of activities looks different from a commercial enterprise's income statements, the financial statement is different only in format, not substance.

The financial information for the year ended August 31, 2007 includes the District's catering services program and day care services program. The catering services program offers catered meals and snacks for District meetings and gatherings, while the day care facilities offer child care services to employees. The costs associated with these programs are accounted for as business-type activities.

The District has no component units for which it is financially accountable.

Fund Financial Statements

Fund financial statements (starting on page 25) report the District's operations in more detail than the government-wide statements by providing information about the District's most significant funds – not the District as a whole. For governmental activities, these statements tell how services were financed in the short term, as well as what resources remain for future spending. They reflect the flow of current financial resources, and supply the basis for tax levies and the appropriations budget. For proprietary activities, fund financial statements tell how goods or services of the District were sold to departments within the District or outside parties and how the sales revenues covered the expenses of the goods or services. The remaining statements, fiduciary statements, provide financial information about activities for which the District acts solely as a trustee or agent for the benefit of those outside of the district.

Laws and contracts require the District to establish some funds, such as the debt service fund. The District's administration establishes other funds to help it control and manage money for particular purposes.

All of the District's funds can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds – Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements. Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide reconciliation to facilitate this comparison between governmental funds and governmental activities.

Management's Discussion and Analysis (continued)

The District maintains several individual governmental funds organized according to their type (special revenue, debt service and capital projects). Information is presented separately in fund financial statements for the general fund, special revenue fund, debt service fund, and capital projects fund, all of which are considered major funds. The District adopts an annual appropriated budget for its general fund, food service program within the special revenue fund, and debt service fund. Budgetary comparison schedules have been provided to demonstrate compliance with these budgets.

Proprietary funds – Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. There are two proprietary fund types – enterprise and internal service funds. The District's enterprise fund is used to account for its business-type activities, a day care program, a catering service program, and a newly established after school program. The internal service funds are an accounting device used to accumulate and allocate costs internally among the various functions. The District uses the internal service fund to report activities for its self-funded insurance programs. The basic proprietary fund financial statements can be found on pages 30-32 of this report.

Fiduciary funds – Fiduciary funds are used to account for resources held for the benefit of parties outside the government. The District is the trustee, or fiduciary, for money raised by student activities. All of the District's fiduciary activities are reported in a separate Statement of Assets and Liabilities on page 33 and a Statement of Changes in Assets and Liabilities on page 58. We exclude these resources from the District's other financial statements because the District cannot use these assets to finance its operations. The district is only responsible for ensuring that the assets reported in these funds are used for their intended purposes.

Notes to the basic financial statements

The notes to the financial statements (starting on page 34) provide narrative explanations or additional data needed for full disclosure in the government-wide statements or the fund financial statements.

Other information

In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information that further explains and supports the information in the financial statements. Required supplementary information can be found on pages 52-54 of this report.

Other supplementary information including combining statements and compliance schedules can be found on pages 55-64 of this report.

Government-Wide Financial Analysis

The District's overall financial position and operations for the past two years are summarized as follows, based on the information included in the government-wide financial statements.

The District's total assets exceeded total liabilities by \$252,599,058. The District's unrestricted net assets – the part of net assets that can be used to finance day-to-day operations without constraints established by debt covenants, enabling legislation, or other legal requirements – was \$87,394,161 on August 31, 2007. Unrestricted net assets increased \$8,374,258 from the prior year, indicative of the District's improved overall financial position.

Total liabilities	298,656,822	299,969,816	12,558	7,453	298,669,380	299,977,269
Net assets:						
Invested in capital assets, net of related debt	154,692,993	145,256,794	113,646	124,277	154,806,639	145,381,071
Restricted	10,398,258	12,873,527			10,398,258	12,873,527
Unrestricted	87,501,567	79,148,071	(107,406)	(128,168)	87,394,161	79,019,903
Total net assets	\$ 252,592,818	\$ 237,278,392	\$ 6,240	\$ (3,891)	\$ 252,599,058	\$ 237,274,501

The increase in cash and investments of \$22,474,098 from the prior year directly relates to the decrease of \$25,141,655 in receivables, mainly from the state. Capital projects, including the construction of the Holmquist Elementary and the renovations for stadium and administration building, contribute to the majority of the \$16,168,282 increase in capital assets from the previous year.

Investment in capital assets (e.g., land, buildings, furniture and equipment), less any related debt used to acquire those assets that is still outstanding is \$154,806,639. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. An additional portion of the District's net assets (approximately 4.1%) represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net assets (\$87,394,161) may be used to finance day-to-day operations without constraints established by debt covenants, enabling legislation, or other legal requirements.

Accrued wages payable decreased \$7,057,852 from the prior year, mainly due to the change in the school start date mandated by the Legislature. This resulted in less days worked by teachers during the 2006-07 fiscal year and a corresponding decrease in the salary expenditures. The increase of \$2,480,431 in unearned revenues is attributable to overpayment of state formula funding in the 2006-07 fiscal year to be utilized in 2007-08.

Governmental activities. Net assets of the District's governmental activities increased \$15,314,426. The total cost of all governmental activities this year was \$385,147,650, and the amount that the District's taxpayers paid for these activities through property taxes was \$156,247,310, or approximately 41%.

Management's Discussion and Analysis (continued)

Significant changes in revenue and expenses include:

- Operating grants/contributions decreased \$16.2 million due to hurricanes Katrina/Rita related grants received in 2005-06.
- The state revenue increase of \$13.4 million is due to Legislative changes. House Bill 1 (H.B. 1) passed on May 12, 2006 was enacted to reduce local maintenance and operations (M&O) tax rates by one third over two years (11% or \$0.17 in 2006-07; another 22% or \$0.33 in 2007-08). However, school districts are allowed to levy an additional four cents without voter approval. School districts are guaranteed to receive state funding through the hold harmless provision in H.B. 1. The reduced funding from local tax levies combined with the increase in state funding reflect the impact of the Reform Legislation which shifts a greater percentage of the financing of public education back to the State.
- The decrease in total instruction and instructional related services mainly relates to the later school start date in August 2007, which resulted in a significant decrease in the wage accrual.
- The increase in non-student based support services is attributable to an increase in utility charges due to the prevailing energy market and property insurance rate increases.
- Total expenses above include depreciation of \$16,231,579. Capital outlay of \$32,442,852 is not included in the above total expenses. In the government-wide financial statements, capital outlay is shown as an increase in the capital assets reported on the statement of net assets and depreciation expense is recorded in the statement of activities in order to spread recognition of the cost of capital assets over their useful lives.

Business-type activities. Business-type activities increased the District's net assets by \$10,131. The increase is relatively insignificant to the overall operations of the District.

Financial Analysis of the District's Funds

As noted earlier, the District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the District's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the District's governmental funds reported combined ending fund balances of \$111,157,290, an increase of \$2,508,211. Approximately 64% of this total amount (\$71,148,277) constitutes unreserved, undesignated fund balance. The remainder of the fund balance is reserved or designated to indicate that it is not available for new spending because it has already been committed 1) for inventory - \$1,596,077, 2) to pay debt service - \$3,617,483, 3) to liquidate purchase orders of the prior period - \$2,139,885, 4) for food service - \$4,990,959, 5) for capital projects - \$23,164,609, 6) for utility, fuel, and property insurance increases - \$4,500,000. The following chart presents the major components of the District's fund balance for both the current and previous fiscal year.

Management's Discussion and Analysis (continued)

The general fund is the primary operating fund of the District. At the end of the current fiscal year, unreserved, undesignated fund balance of the general fund was \$71,148,277, while the total fund balance was \$78,838,307. As a measure of the general fund's liquidity, it may be useful to compare unreserved, undesignated fund balance to the total fund expenditures. Unreserved, undesignated fund balance represents 23% of the total general fund expenditures.

During the current fiscal year, the Board approved a transfer of \$4,000,000 from the general fund to the capital projects fund in order to address capital improvement needs throughout the District. The fund balance of the general fund increased \$5,962,782 from previous year. The increase was primarily attributable to the significant decrease in the wage accrual.

The fund balance for food service should not exceed three months of average food service operations expenditures. The fund balance at the end of 2005-06 was significantly higher than these guidelines. The budget for 2006-07 was prepared with a planned reduction in fund balance. The reduction plan included additional staffing units, upgraded salaries, equipment replacement, and reduced plate lunch prices, which all contributed to a fund balance decrease of \$1,665,647. Food service fund balance at the end of 2006-07 was \$5,536,891.

The debt service fund has a total fund balance of \$3,617,483, all of which is reserved for the payment of debt service. The tax rate for this fund remained unchanged, at \$0.22 per \$100 of assessed value, to reduce the reserve and minimize the tax burden to the taxpayers.

Fund balance for the capital projects fund at August 31, 2007 was \$23,164,609. As a result of unspent bond proceeds in previous years, the fund began the year with \$24,187,726 in fund balance. The District received \$24,020,107 in bond proceeds and premiums, while spending \$30,165,539 in the current year on capital outlay and bond issuance costs. Another \$4,000,000 was transferred from the general fund at year end. The remaining fund balance is designated for future construction projects, including classroom additions, renovation of the administration building and stadium, and various maintenance projects throughout the District.

Proprietary Funds. The District's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net assets of the District's catering enterprise fund at the end of the year were \$2,974. The District has adjusted catering prices to address the deficit position at the end of 2005-06. The District's day care fund ended the year with positive net assets of \$3,266. The internal service fund used to account for the District's self-funded insurance programs experienced a decrease in net assets of \$89,531 to a balance of \$3,575,770 at August 31, 2007. This decrease was primarily due to increased claims costs in the health insurance fund.

General Fund Budgetary Highlights

Over the course of the year, District personnel recommended, and the Board of Trustees approved, several revisions to budgeted revenue and appropriations. Revisions to the revenue budget were necessary due to changes in estimates for local and state revenue based on revised enrollments and rising interest rates. Revisions to appropriations were necessary due to staffing adjustments based on actual enrollment, changes in spending needs over the course of the year, and other unexpected occurrences.

Management's Discussion and Analysis (continued)

The District's major budget amendments during the year are summarized as follows:

- The expenditure budget was increased by \$2.3 million to allocate funds for the additional District contributions to the health insurance fund.
- A \$4.0 million budget amendment was approved for a transfer from the general fund to the capital projects fund to address technology plan and various capital projects.
- The payroll budget was reduced by \$7.9 million to reflect the savings from vacant positions throughout the District and the estimated reduction in the year-end wage accrual.
- In order to purchase the land for a future school site, a \$1.1 million budget amendment was approved.
- The expenditure budget was increased for \$1.1 million, which was the remaining balance that was unspent from 2005-06 fiscal year budget for the District's new finance software system.
- A \$1.5 million budget was set up for stadium renovations.
- The electricity budget was increased by \$1.0 million to cover the increasing costs.
- The property insurance budget was increased by \$1.5 million due to rising rates throughout the Gulf Coast area.
- Rising interest rates resulted in a \$2.0 million increase in the interest earnings revenue budget.
- The revenue budget was amended to modify projections: a \$5.6 million increase for local tax collections and a \$4.2 million decrease for state funding due to student enrollment numbers that did not meet the projection used for the original budget.
- The state funding of \$3.0 for High School Allotment, established by H.B. 1, was originally budgeted under the general fund. The budgets for expenditure and revenue were reclassified to a special revenue fund according to TEA guidelines.

After revenue budgets and appropriations were adjusted as described, the District's general fund balance of \$78,838,307 differs from the final budgetary fund balance of \$69,014,106 reported in the budgetary comparison schedule on page 52. This is primarily due to the following factors:

- Payroll expenditures were \$4.9 million less than the final budget. The District had a significant decrease in the salary accrual amount due to the legislature mandate that required districts to move back the school start date.
- Capital outlay expenditures were \$2.0 million less than the final budget. This amount is primarily attributable to the new finance system and the stadium renovation. Both of these projects were started in the 2005-06 fiscal year, but are still on-going at year-end and will continue into the next school year. The remainder of these projects will be budgeted in the 2007-08 fiscal year.

Management's Discussion and Analysis (continued)

Capital Asset and Debt Administration

Capital Assets

The District's investment in capital assets for its governmental and business-type activities as of August 31, 2007, amounts to \$402,427,455 (net of accumulated depreciation of \$250,547,511). This investment in capital assets includes facilities and equipment for instruction, transportation, athletics, administration, and maintenance. The total increase in the District's investment in capital assets for the current year was approximately four percent.

Major capital asset events during the current fiscal year included the following:

- Classroom additions at Sneed Elementary School for \$1.8 million
- Current year expenditures of \$9.6 million on construction of Holmquist Elementary
- Land purchases for future school sites in the amount of \$6.0 million
- A total of \$6.5 million was spent for stadium and administration building renovations, an addition at Chancellor Elementary School, and wall enclosures at the high schools

Capital Asset Summary

	Governmental Activities		Business-type Activities		Total	
	August 31, 2007	August 31, 2006	August 31, 2007	August 31, 2006	August 31, 2007	August 31, 2006
Land	\$ 65,028,631	\$ 58,825,197			\$ 65,028,631	\$ 58,825,197
Buildings and improvements	303,255,688	302,342,000	\$ 102,384	\$ 111,690	303,358,072	302,453,690
Furniture and equipment	13,055,683	12,120,170	11,262	12,587	13,066,945	12,132,757
Construction in progress	20,973,807	12,847,529			20,973,807	12,847,529
Total capital assets (net of depreciation)	\$ 402,313,809	\$ 386,134,896	\$ 113,646	\$ 124,277	\$ 402,427,455	\$ 386,259,173

Additional information on the District's capital assets can be found on pages 43-44 in the notes to the financial statements.

Debt

At year end, the District had total bonded debt outstanding of \$264,763,656. The District retired \$22,395,000 of debt during 2006-07 and issued \$41,228,656 in unlimited tax schoolhouse and refunding bonds. Business-type activities have no debt outstanding.

The ratio of net general bonded debt to assessed valuation is a useful indicator of the District's debt position. This data is presented in the statistical section on page 81 and reflects a decrease in the ratio of net bonded debt to assessed value from 2.81% last year to the current year ratio of 2.65%.

Bonded Debt Summary

	Governmental Activities	
	August 31, 2007	August 31, 2006
General Obligation Bonds	\$ 264,763,656	\$ 263,400,000

Management's Discussion and Analysis (continued)

The "AAA" long-term rating on the District's bonds reflects the Texas Permanent School Fund guarantee. The underlying rating on the District's bonds is "Aa2" from Moody's and "AA" from Standard and Poors.

A portion of the District's long-term debt is accrued compensated absences. The compensated absences liability at August 31, 2007 is \$5,209,417, which is slightly more than the previous year's accrual. This liability is made up of unused vacation and sick days accrued by District personnel.

More detailed information about the District's long-term liabilities is presented on pages 44-46 in the notes to the basic financial statements.

Economic Factors and Next Year's Budgets and Rates

As part of the budget development process, the District's management has taken into consideration the factors that drive school district budgets: enrollments, property values, state funding, facility needs, and the economy. The District's elected and appointed officials considered these and other factors when setting the fiscal year 2008 general fund budget and tax rate. The adopted budget is based on the following significant assumptions:

- Developing enrollment projections has been complicated since 2005-06 due to hurricane evacuee students. After experiencing the unusual variations during the last two years, the projection was set at 44,716, a decline of 1,024 from the October 2006 count.
- H.B. 1 required districts to further compress local M&O tax rates by another 22% in 2007-08 (\$1.00 for Alief). School districts are guaranteed by the State to receive comparable total revenues per weighted student through the hold harmless provision.
- General fund expenditures are budgeted to increase by 3.5% over the final 2006-07 expenditures. The increase was due to the following factors:
 - The Board approved a \$2,035 across the board increase for all employees paid from the teacher salary schedule. For all other personnel, a 4% of the midpoint increase of pay grades was approved. The approximate cost of these salary increases is \$9.2 million. The State provided approximately \$1.3 million in additional revenue to fund the educator salary increase for 2007-08; the remainder was funded through existing revenue sources and by reducing expenditures through other means.
 - At the secondary level, the student schedule was changed from block to a seven period day allowing for a decrease in the number of teaching units. Research does not show a definitive advantage in using a block schedule and some research indicates that daily contact with a subject is advantageous to struggling students. This decrease offset the increase resulting from the raise increase so that payroll remained relatively flat from 2006-07 to 2007-08.
 - The significant decrease in the wage accrual in 2006-07 due to the legislature mandate that required districts to move back the school start date.

Requests for Information

This financial report is designed to provide our citizens, taxpayers, customers, investors, and creditors with a general overview of the District's finances and to show the District's accountability for the money it receives. Questions concerning any of the information provided in this report, or requests for additional information, should be addressed to the Office of the Assistant Superintendent for Finance, Alief I.S.D., 12302 High Star, Houston, Texas, 77072.

Exhibit C-2

***Reconciliation of the Governmental Funds Balance Sheet
to the Statement of Net Assets
August 31, 2007***

Total fund balances - governmental funds balance sheet	\$ 111,157,290
<p>Amounts reported for governmental activities in the statement of net assets ("SNA") are different because:</p>	
<p>The District uses the internal service fund to charge the costs of self-insurance activities to appropriate functions in other funds. The assets and liabilities of the internal service funds are included in the governmental activities in the statement of net assets. The net effect of this consolidation is to increase net assets.</p>	3,575,770
<p>Capital assets used in governmental activities are not financial resources and, therefore, are not reported in governmental funds. The cost of these assets is \$652,800,438 and the accumulated depreciation is \$250,486,629, resulting in a net addition to net assets.</p>	402,313,809
<p>In addition, long-term liabilities, including bonds payable, are not due and payable in the current period, and, therefore, are not reported as liabilities in the governmental funds, resulting in a net decrease of \$264,763,656</p>	(264,763,656)
<p>Property taxes receivable and the penalty and interest will be collected in the future, but are not available soon enough to pay for the current period's expenditures and therefore, are deferred in the funds. These are added back to net assets.</p>	8,533,562
<p>Long term liabilities for compensated absences are not included in the fund liabilities which decrease the net assets on the government-wide basis.</p>	(4,849,417)
<p>Various other reclassifications and eliminations are necessary to convert from the modified accrual basis of accounting to the accrual basis of accounting. These include recognizing the liabilities of (\$526,518) associated with long-term debt interest, recognizing the deferred amounts related to premiums of (\$6,742,058), the loss on refunding of \$3,265,180, capital bond and other debt issuance costs of \$1,807,181, and the interest in capital appreciation bonds (\$1,178,325).</p>	(3,374,540)
Net Assets of Governmental Activities	<hr/> \$ 252,592,818 <hr/>

Alief Independent School District

Exhibit C-4

*Reconciliation of the Statement of Revenues, Expenditures, and
Changes in Fund Balance of Governmental Funds to the Statement of Activities
Year Ended August 31, 2007*

Net change in fund balances - total governmental funds	\$ 2,508,211
<p>Amounts reported for governmental activities in the statement of activities ("SOA") are different because:</p>	
<p>The District uses internal service funds to charge the costs of self insurance to appropriate functions in other funds. The net income/loss of internal service funds is reported with governmental activities. The net effect of this consolidation is to decrease net assets.</p>	<p>(89,531)</p>
<p>Capital outlays are reported in governmental funds as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. The amount of capital outlay during the year increases net assets.</p>	<p>32,442,852</p>
<p>Depreciation is not recognized as an expense in governmental funds since it does not require the use of current financial resources. The net effect of the current year's depreciation is to decrease net assets.</p>	<p>(16,231,579)</p>
<p>Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets.</p>	<p>22,395,000</p>
<p>Current year proceeds from bond issuance are other financing sources in the fund financial statement, but should be shown as an increase in long-term debt in the government-wide statement.</p>	<p>(23,758,656)</p>
<p>Property taxes and penalty and interest receivables at year end will not be collected for several months after the district's fiscal year ends, so they are not considered available revenues and are deferred in the governmental funds. Deferred tax revenues decreased by this amount this year and is a decrease to net assets.</p>	<p>(84,810)</p>
<p>Compensated absences (sick and vacation pay) are measured by the amounts earned during the year in the statement of activities. In the governmental funds, however the expenditures for these items are measured by the amount of financial resources used (essentially the amounts actually paid or to be paid at year end for retiring employees.) This year vacation and sick leave paid out was less than the amounts earned, decreasing net assets.</p>	<p>(649,536)</p>

Net change in fund balances - total governmental funds (continued)

An accrual for interest expense is not recognized in the governmental fund basis but is in the statement of activities. The interest accrual was less this year than last year thereby increasing net assets. 39,782

Bond issuance costs, deferred charges on bond refunding, and other debt charges which are treated as expenditures or other sources/uses in the fund basis financial statements are set up as assets and amortized in the statement of net assets. The net change for each represents an increase/(decrease) in net assets:

Bond issuance costs	352,072
Bond premium/discounts	(752,268)
Gain/loss on refunding	353,573
Interest on capital appreciation bonds	(1,178,325)

Amounts recognized in the governmental fund basis and the statement of net assets differ due to the sale and retirement of assets. (37,359)

Donated capital assets are not reported in governmental funds as revenues. However, in the statement of activities, the revenues are increased by the fair value of the capital assets.

5,000

Change in Net Assets of Governmental Activities

\$ 15,314,426

Notes to the Basic Financial Statements

Note 1 – Summary of Significant Accounting Policies

The Alief Independent School District (the “District”) is an independent public educational agency operating under applicable laws and regulations of the State of Texas. The District is autonomously governed by a seven member Board of Trustees elected to staggered three-year terms by the District’s residents.

The accounting policies of the District substantially comply with the rules prescribed in the Texas Education Agency’s *Financial Accountability System Resources Guide (“the Resource Guide”)*. The accounting policies included in the Resource Guide conform to generally accepted accounting principles applicable to governmental units. The following is a summary of the most significant policies:

In 2002, the District implemented GASB Statement No. 34, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments* (GASB Statement No. 34), and GASB Statement No. 37, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments: Omnibus*, which provides additional guidance for the implementation of GASB Statement No. 34, and GASB Statement No. 38, *Certain Financial Statement Note Disclosures*, which change note disclosure requirements for governmental entities.

GASB Statement No. 34 established a new financial reporting model for state and local governments that included the addition of management’s discussion and analysis, government-wide financial statements, required supplementary information, and the elimination of the effects of internal service activities and the use of account groups to the already required fund financial statements and notes.

The GASB determined that fund accounting has and will continue to be, essential in helping governments to achieve fiscal accountability and should, therefore, be retained. The GASB also determined that government-wide financial statements are needed to allow users of financial reports to assess a government’s operational accountability. The new GASB model integrates fund-based financial reporting and government-wide financial reporting as complementary components of a single comprehensive financial reporting model.

A. Reporting Entity

The District is an independent political subdivision of the State of Texas governed by an elected board of trustees and is considered a primary government. As required by generally accepted accounting principles, these financial statements have been prepared based on considerations regarding the potential for inclusion of other entities, organizations, or functions as part of the District’s financial reporting entity. Based on these considerations, no other entities have been included in the District’s reporting entity. Additionally, as the District is considered a primary government for financial reporting purposes, its activities are not considered a part of any other governmental or other type of reporting entity.

The District has also implemented GASB Statement No. 39, *Determining Whether Certain Organizations are Component Units*. The District receives support from various PTO, Booster club, and Foundation organizations. None of these organizations meet the criteria specified by GASB 39 to be included in the District’s Financial Statements. Therefore, there are no component units included within the reporting entity.

Considerations regarding the potential for inclusion of other entities, organizations, or functions in the District’s financial reporting entity are based on criteria prescribed by generally accepted accounting principles. These same criteria are evaluated in considering whether the District is a part of any other government or other type of reporting entity. The overriding elements associated with prescribed criteria considered in determining that the District’s financial reporting entity status is that of a primary government are: that it has a separately elected governing body; it is legally separate; and it is fiscally independent of other state and local governments. Additional prescribed criteria under generally accepted accounting principles include considerations pertaining to organizations for which the primary government is financially accountable; and considerations pertaining to other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity’s financial statements to be misleading or incomplete.

Alief Independent School District
Notes to the Basic Financial Statements

Note 1 – Summary of Significant Accounting Policies (continued)

B. Government Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statements of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which are supported by taxes and intergovernmental revenues, are reported separately from business-type activities which rely on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and 2) grants and contributions that are restricted to meeting operational or capital requirements of a particular function. Taxes and other items not properly included among program revenues are reported instead as general revenues.

All interfund transaction between governmental funds and between governmental funds and internal service funds are eliminated on the government-wide statements. Interfund activities between governmental funds and enterprise funds remain on the government-wide statements. Interfund activities between governmental funds and fiduciary funds remain as due to/due from on the government-wide statement of net assets.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded in the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. The government-wide financial statements are reported using the economic resources measurement focus, as are the proprietary fund financial statements. The government-wide statements, proprietary fund statements, and fiduciary fund financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recognized when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net current assets. Revenues are recognized in the accounting period in which they become both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Revenues susceptible to accrual include state costs reimbursements and interest on temporary investments. Property tax levies collected after the fiscal year-end which would be available to finance current operations are immaterial and remain deferred. Under modified accrual accounting, expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable, except for principal and interest on general long-term debt, which is recognized when due.

Alief Independent School District
Notes to the Basic Financial Statements

Note 1 – Summary of Significant Accounting Policies (continued)

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation (continued)

Revenues from grants accounted for in the Special Revenue Fund are recognized as soon as all eligibility requirements imposed by the provider have been met. Any excess of revenues or expenditures at fiscal year-end is recorded as deferred revenue or due from the granting agencies, respectively.

D. Fund Accounting

The District reports the following major governmental funds.

General Fund

The General Fund is the government's primary operating fund. It is used to account for all financial transactions not properly includable in other funds. The principal sources of revenues include local property taxes and state reimbursement for professional salaries and other operating expenditures. Expenditures include all costs associated with the daily operations of the schools.

Special Revenue Fund

The Special Revenue Fund is used to account for various programs. Specifically, this type of fund is used to account for the District's Food Service Program, including local, state, and federal revenue sources, for federally financed programs (grants) where unused balances are returned to the grantor at the close of specified project periods and other state and local revenue specific programs. The Food Service Operation is the only required budgeted program. For all other programs in this fund type, project accounting is employed to maintain integrity for the various sources of the funds. Resources accounted for in this fund are awarded to the District for the purpose of accomplishing specific educational tasks as defined by the grantors in contracts or other agreements.

Debt Service Fund

The Debt Service Fund is used to account for the payment of interest and principal on all bonds of the District. Primary sources of revenue for debt service are local property taxes and the state existing debt and instructional facilities allotments.

Capital Projects Fund

The Capital Projects Fund includes funds that are used to account for the expenditures of resources accumulated from sales of bonds and related interest earnings for the acquisition and construction of school facilities and other capital asset acquisitions.

Additionally, the District reports the following fund type:

Proprietary Funds

Proprietary funds distinguish operating revenues and expense from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations.

Enterprise Funds

Private-sector standards of accounting and financial reporting issued on or before November 30, 1989, generally are followed in both the government-wide and enterprise fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. The government has elected not to follow subsequent private-sector guidance.

The Enterprise Funds are used to account for revenues and expenditures of the District's daycare facilities, the food service department's catering operations, and the new after school program. Revenues for the daycare and after school program are primarily from fees paid from participants in the program. The revenues in the catering fund are from food provided to various campuses and departments for various types of meetings / events.

Alief Independent School District
Notes to the Basic Financial Statements

Note 1 – Summary of Significant Accounting Policies (continued)

D. Fund Accounting (continued)

Internal Service Fund

The District's two internal service funds are used to account for the operations of the District's medical insurance plan, dental insurance plan, and workers' compensation plan, which are supported by employer and/or employee contributions. Expenses include plan benefit payments to employees and charges incurred in administering the plan. The estimated amount due for claims incurred, but not reported (IBNR) at year-end, are included as fund liabilities.

Additionally, the District reports the following fiduciary fund:

Agency Fund

The Agency Fund is used to account for the cash receipts and disbursements of the school activity funds of the individual schools. These funds have no revenues, expenditures, or equity, and the District does not budget for them.

E. Cash and Cash Equivalents

The District considers the following items cash and cash equivalents for financial reporting purposes (including the statement of cash flows for the Proprietary Funds): cash on hand, demand deposits, money market mutual funds, balances in private-managed public funds investment pools, and short-term investments with original maturities of three months or less from the date of acquisition.

F. Investments

Investments consist primarily of U.S. Government Agency Securities which are stated at fair value based on quoted market prices. The net increase or decrease in the fair value of investments is netted with investment income in local sources of revenue. Investments are generally held to maturity.

G. Inventories

Inventory is stated at weighted average cost. The costs are recorded as expenditures as the individual inventory items are consumed. Inventory consists of general and food service supplies and commodities. Although commodities are received at no cost, they are recorded in the inventory and revenue at market values as supplied by the Texas Department of Human Services. When consumed, commodities are recorded as expenditures.

H. Interfund Activity

Interfund activity results from loans, services provided, reimbursements, or transfers between funds. Loans are reported as interfund receivables and payables as appropriate and are subject to elimination upon consolidation.

I. Capital Assets

Capital assets, which include land, buildings, and furniture and equipment, and construction in progress, are reported in the applicable governmental activities column in the government-wide financial statements. Capital assets are defined by the government as assets with an initial, individual cost of more than \$5,000 and an estimated useful life of two years or greater. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Costs of the Facilities Acquisition and Construction Function that relate to overall planning of District facilities, managing overall District assets and overall construction projects are treated as period costs and are not capitalized unless related to specific assets. Donated capital assets are recorded at estimated fair market value at the date of donation.

Alief Independent School District
Notes to the Basic Financial Statements

Note 1 – Summary of Significant Accounting Policies (continued)

I. Capital Assets (continued)

The costs of normal maintenance and repairs that do not add to the value of the assets or materially extend asset lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Buildings and furniture and equipment of the District are depreciated using the straight line method over the following estimated useful lives:

<u>Assets</u>	<u>Years</u>
Building & Improvements	40
Vehicles	7-10
Computer Equipment	7
Other Equipment	5-15

J. Long-Term Debt

In the government-wide financial statements and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight line method. Bonds payable are reported net of the applicable bond premium or discount. Bonds issuance costs are reported as deferred charges and amortized over the term of the related debt.

K. Compensated Absences

The District maintains a policy allowing employees meeting established requirements to be compensated for unused sick leave at retirement. Estimated amounts accrued by the District's employees meeting the requirements for compensation for unused sick leave are recorded as either current or long-term liabilities, depending on the amount that was due to employees at year-end. Due means that the employee has been granted the leave but has not taken the leaves or received payment at year-end and it will be paid from current financial resources. Annual vacation time is granted to eligible employees on the first day of July of each year and all unused vacation time lapses after eighteen months. At year end, the portion due to employees who had terminated employment is considered a current liability and the remainder is recorded as long-term.

L. Net Assets

When an expense is incurred for purposes for which both restricted and unrestricted net assets are available, the District spends restricted funds first and uses unrestricted resources when the restricted funds are depleted.

M. Fund Equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted for a specific use or to indicate that a portion of the fund balance is not available for expenditures. Designations of fund balance represent tentative management plans that are subject to change.

N. Use of Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

Alief Independent School District
Notes to the Basic Financial Statements

Note 1 – Summary of Significant Accounting Policies (continued)

O. Data Control Codes

Data control codes refer to the account structure prescribed by the Texas Education Agency (TEA) in the Resource Guide. TEA defines and requires this uniform account structure for school districts in Texas.

Note 2 – Cash and Investments

The District's cash and investments are reported at fair value. The District's cash and investment accounts are classified as either cash and cash equivalents or investments. The cash and cash equivalents include cash on hand, deposits with financial institutions, money market mutual funds, and short-term investments in private-managed public funds investment pool accounts (Texpool, LOGIC, and Lone Star). The investments, which have maturities at purchase of greater than three months, consist of U.S. Government Agency Securities.

The Board of Trustees of the District has adopted a written investment policy regarding the investment of its funds as defined in the Public Funds Investment Act of 1995 (Chapter 2256, Texas Government Code). The Public Funds Investment Act requires an annual audit of its investment practices. Audit procedures in this area, conducted as part of the audit, disclosed that in the area of investment practices, management reports, and establishment of appropriate policies, the District was in substantial compliance with the requirements of this Act. Additionally, the investments and investment practices of the District are in compliance with the Trustees' investment policies. The District invests primarily in money market funds, public funds investment pools, and obligations of certain U.S. Government agencies, although the District's investment policy allows other investment options authorized by State statute. The District generally holds all U.S. Government Securities to maturity. The District did not have any derivative investment products during the year.

State law and District policy provides that collateral pledged as security for bank deposits must have a market value of not less than the amount of the deposits and must consist of 1) obligations of the U.S. or its agents and instrumentalities; 2) direct obligations of the State of Texas or its agencies; 3) other obligations, the principal and interest on which are unconditionally guaranteed or insured by the State of Texas; and/or 4) obligations of states, agencies, counties, cities, and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than A or its equivalent.

The Texas Education Code and the Public Funds Investment Act regulate deposits and investment transactions of the District. The District is authorized by the Texas Education Code to place the proceeds from debt issues in properly secured or collateralized interest bearing time deposits with any Texas state or national bank having federal depository insurance (FDIC) coverage for depositors or directly in bonds or other obligations of the United States, provided that these time deposits cannot be cashed, sold, or redeemed for an amount less than that originally invested by the District. Additionally, the Texas Education Code authorizes the District to invest in direct debt securities of the U.S. or other types of bonds, securities, warrants, etc., which the District is authorized by law to invest.

In accordance with applicable statutes, the District has a depository contract with Bank of America providing for interest rates to be earned on deposited funds and for banking charges the District incurs as a result of banking services provided. The District may place funds with the depository in interest and non-interest bearing accounts. Statutes and the depository contract require that all funds in the depository institution be fully secured by federal depository insurance or a combination of federal depository insurance and acceptable collateral securities and/or an acceptable surety bond. The collateral securities must be delivered to the District or placed with an independent trustee institution with safekeeping receipts delivered to the District and copies of the safekeeping receipts delivered to the Texas Education Agency. In accordance with State statutes pertaining to lawful collateralization of District deposits, safekeeping receipts are issued in the name of the depository with proper indication that the collateral securities are pledged by the depository to secure funds of the District. The District must approve all collateral securities prior to their being pledged. The depository can change collateral securities pledged to secure District funds only upon obtaining the written approval of the District.

Alief Independent School District
Notes to the Basic Financial Statements

Note 2 – Cash and Investments (continued)

At August 31, 2007, the District's cash and investment balances were as follows:

	<u>Total Fair Value</u>	<u>Governmental Activities</u>	<u>Business Type Activities</u>	<u>Fiduciary Funds</u>
Cash and checking accounts	\$ 2,700,307	\$ 1,109,235	\$ -	\$ 1,591,072
Texpool	34,049,604	34,049,604		
Local Government Investment Cooperative	35,613,242	35,613,242		
Lone Star Investment Pool	28,949,063	28,949,063		
U.S. Agency obligations	33,106,773	33,106,773		
	<u>\$ 134,418,989</u>	<u>\$ 132,827,917</u>	<u>\$ -</u>	<u>\$ 1,591,072</u>

The District's investments are insured, registered, or the District's agent holds the securities in the District's name. Therefore, the District is not exposed to custodial credit risk. Custodial credit risk for investments is the risk that, in event of the failure of the counterparty (e.g., broker dealer) to a transaction, a government will not be able to recover the value of its investments or collateral securities that are in the possession of another party. The District's policy requires that a third party bank trust department hold all securities owned by the District.

As of August 31, 2007, the District's bank balance was not exposed to custodial risk because it was insured and collateralized with securities held by the District's agent and in the District's name.

Credit Risk

State law and the District's investment policy limit investments in all categories to top ratings issued by nationally recognized statistical rating organizations. Investment credit ratings by category are shown below.

	<u>Fair Value</u>	<u>Investment Rating</u>
Texpool	\$ 34,049,604	AAAm
Local Government Investment Cooperative	35,613,242	AAAm
Lone Star Investment Pool	28,949,063	AAAf/S1+
U.S. Agency obligations	33,106,773	AAA
	<u>\$131,718,682</u>	

Interest Rate Risk

In accordance with its investment policy, the District manages its exposure to declines in fair value by limiting the weighted average maturity of its investment portfolio to less than 18 months.

At August 31, 2007, the weighted average maturities of the District's investments were as follows:

	<u>Fair Value</u>	<u>Weighted Average Maturity (days)</u>
Texpool	\$ 34,049,604	35
Local Government Investment Cooperative	35,613,242	22
Lone Star Investment Pool	28,949,063	26
U.S. Agency obligations	33,106,773	179
Total	<u>\$131,718,682</u>	
Portfolio weighted average maturity		66

Alief Independent School District
Notes to the Basic Financial Statements

Note 2 – Cash and Investments (continued)

The fair value of the U.S. Government Agency Securities and Commercial Paper are based on quoted market prices. The investments are reported by the District at fair value. The amount of increase or decrease in the fair value of investments during the year ended August 31, 2007, is included in investment income as shown below:

Interest Income	\$ 8,343,095
Net Increase in Fair Value of Investments	<u>44,556</u>
Total Investment Income	<u><u>\$ 8,387,651</u></u>

Note 3 – Property Taxes

Property taxes are levied by October 1 on the assessed value listed the prior January 1 for all real and business personal property located in the District in conformity with Subtitle, E, Texas Property Tax Code. Taxes are due on receipt of the tax bill and are delinquent if not paid before February 1 of the year following the year in which imposed. On January 31 of each year, a tax lien attaches to the property to secure the payment of all taxes, penalties, and interest ultimately imposed. Appraised values are established by the Central Appraisal District (CAD) of Harris County, Texas. Taxes are levied by the District's Board of Trustees based on the appraised values from the CAD. Billing and collection of tax levies are performed by the District.

Property tax rates, established in accordance with state law, are levied on real and personal property within the District's boundaries for use in financing general government and debt service expenditures. Tax rates levied to finance general government and debt service expenditures for 2006-07 were \$1.37 and \$0.22, respectively, per \$100 of valuation. Based on an assessed valuation of approximately \$9.8 billion, the resulting tax levy, after exemptions and adjustments, was approximately \$155.1 million.

Allowances for uncollectible taxes are based on historical experience in collecting property taxes. Uncollectible personal property taxes are periodically reviewed and written off, but the District is prohibited from writing off real property taxes without specific statutory authority from the Texas Legislature.

Net property taxes receivable at August 31, 2007, consisted of the following:

	<u>General Fund</u>	<u>Debt Service Fund</u>	<u>Totals</u>
Delinquent taxes - Current year levy	\$ 2,500,233	\$ 401,616	\$ 2,901,849
Delinquent taxes - Prior years' levies	<u>3,445,368</u>	<u>580,234</u>	<u>4,025,602</u>
Delinquent Taxes Receivable	5,945,601	981,850	6,927,451
Receivable for penalties and interest	<u>2,609,098</u>	<u>480,955</u>	<u>3,090,053</u>
Total Property Taxes Receivable	<u>8,554,699</u>	<u>1,462,805</u>	<u>10,017,504</u>
Less allowance for uncollectible taxes	<u>(1,265,020)</u>	<u>(218,922)</u>	<u>(1,483,942)</u>
Net Property Taxes Receivable	<u><u>\$ 7,289,679</u></u>	<u><u>\$ 1,243,883</u></u>	<u><u>\$ 8,533,562</u></u>

Alief Independent School District
Notes to the Basic Financial Statements

Note 4 – Receivables Due From Other Governments

Receivables due from other government agencies at August 31, 2007, consisted of the following:

	Governmental Funds
Local grant expenditure reimbursement from other local sources	\$ 69,404
State grant expenditure reimbursement from the state	1,256,710
Federal grant expenditure reimbursement passed through the state	1,875,337
	<u>\$ 3,201,451</u>

Note 5 – Interfund Receivables and Payables

Interfund balances at August 31, 2007, consisted of the following:

<u>Receivable Fund</u>	<u>Payable Fund</u>	<u>Amount</u>
General Fund	Special Revenue Fund	\$2,942,686
	Daycare Fund	115,193
	Catering Fund	8,988
Debt Service Fund	General Fund	115,858
Capital Projects Fund	General Fund	16,357
After School Program	General Fund	8,647
Internal Service Fund	General Fund	164,609
		<u>\$3,372,338</u>

The District had not cleared the interfund receivables and payables at year end. Interfund balances represent short-term borrowings between funds for operating expense payments or amounts collected in the general fund to be distributed to other funds. All interfund balances are expected to be settled shortly after year-end.

Day care facilities	<u>\$ 16,903</u>

Note 7 – Long-Term Debt

Long-term debt consists of bonds payable, related accretion values on premium of capital appreciation bonds, and a provision for compensated absences. General fund revenues are typically used to liquidate the compensated absences liability. See Note 14, for additional disclosures regarding compensated absences. Bonds are payable solely from future revenues of the Debt Service Funds which consist primarily of property taxes collected by the District, state facilities and existing debt allotments, and investment income. The District is in compliance with all significant bond compliance requirements.

A summary of long-term debt transactions of the District for the year ended August 31, 2007, follows:

	<u>Balance September 1, 2006</u>	<u>Issued and Additions</u>	<u>Refunded and Retired</u>	<u>Balance August 31, 2007</u>	<u>Current Portion</u>
Bonds	\$ 263,400,000	\$ 41,228,656	\$(39,865,000)	\$264,763,656	\$23,350,000
Accretion on premium capital appreciation bonds		1,178,325		1,178,325

Notes to the Basic Financial Statements

Note 8 – Advance Refundings of General Long-Term Debt

Current Year Refundings

On June 14, 2007, the District issued \$17,469,863 in Unlimited Tax Refunding Bonds with interest rates from 4% - 4.375% to advance refund \$3,450,000, \$5,200,000, and \$8,820,000 of outstanding Series 1999, Series 1999 II, and Series 2001, respectively, with interest rates from 4.75% - 5.40%. The proceeds were deposited in an irrevocable trust with an escrow agent to provide all future debt service payments on the refunded bonds. At August 31, 2007, \$17,470,000 of the Series 1999, 1999II, and Series 2001 bonds are considered to be defeased and the liability for these bonds has been removed from the Statement of Net Assets.

The District advance refunded the Series 1999, Series 1999 II, and Series 2001 Bonds to reduce the total debt service payments by approximately \$764,246 and to obtain an economic net gain (difference between the present values of the debt service payments on the old and new debt) of \$ 588,748.

Prior Year Refundings

In the prior years, the District defeased certain outstanding school construction and refunding bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the District's financial statements. As of August 31, 2007, \$27,900,000 of the previously refunded bonds are considered defeased.

Note 9 – Revenues from Local Sources

During the current year, revenues from local sources consisted of the following:

	General Fund	Special Revenue Fund	Debt Service Fund	Capital Projects Fund	Totals
Property taxes	\$ 133,136,744		\$ 21,364,365		\$ 154,501,109
Penalties, interest, and other related tax income	1,583,209		247,803		1,831,012
Investment income	5,912,325	\$ 378,783	663,528	\$ 1,122,315	8,076,951
Food sales		4,713,755			4,713,755
Co-curricular activities	241,384				241,384
Other	1,772,678	1,152,792	28,555		2,954,025
	<u>\$ 142,646,340</u>	<u>\$ 6,245,330</u>	<u>\$ 22,304,251</u>	<u>\$ 1,122,315</u>	<u>\$ 172,318,236</u>

Note 10 – Deferred Revenues

Deferred revenues at August 31, 2007, represent assets that are not available for use by the District to liquidate current year liabilities. A summary of deferred revenues by fund follows:

	General Fund	Special Revenue Fund	Debt Service Fund	Total
Net property taxes receivable (net of allowance for doubtful accounts)	\$ 7,289,679		\$ 1,243,884	\$ 8,533,563
Overpayment from state funding	1,861,287		1,564,241	3,425,528

SHARS - Medicaid Reimbursement Program	N/A	281,094
E-Rate	N/A	297,361
Total		<u><u>\$ 1,361,341</u></u>

Note 12 – Retirement Plan

Plan Description

The District contributes to the Teacher Retirement System of Texas. The Teacher Retirement System of Texas, a public employee retirement system (PERS), is a multiple-employer defined benefit contribution plan. It is a cost-sharing PERS with one exception – all risks and costs are not shared by the employer but are the liability of the State of Texas. By statute, the State of Texas contributes to the retirement system an amount equal to the current authorized rate times the aggregate annual compensation of all members of the retirement system during that fiscal year. The payroll for District employees covered by the system for the fiscal year ended August 31, 2007, was approximately \$257 million. The District's total payroll was approximately \$259 million.

For members of the retirement system entitled to the State's statutory minimum salary for certain school personnel, the District pays the state's contribution on the portion of the member's salary that exceeds the statutory minimum.

Types of Employees Covered

All employees of public, state-supported education institutions in Texas who are employed for one-half or more of the standard workload and who are not exempted from membership under Texas Government Code are covered by the plan.

Benefit Provisions

The Teacher Retirement System of Texas administers retirement and disability annuities and death and survivor benefits to employees and beneficiaries of employees of the public school system of Texas. It operates primarily under the provisions of Texas Constitution Article XVI, Section 67 and Texas Government

Alief Independent School District
Notes to the Basic Financial Statements

Note 12 – Retirement Plan (continued)

Code, Title 8, Subtitle C. The system also administers proportional retirement benefits under Texas Government Code, Title 8, Chapter 803.

Service Requirement

1. Normal Age 65 with 5 years of service
 Any combination of age and service totaling 80 with at least 5 years of service

2. Reduced Age 55 with at least 5 years of service
 Any age below 50 with 30 years of service

A member is fully vested after 5 years of creditable service and entitled to any benefit for which eligibility requirements have been met.

Funding Policy

State law provides for a state contribution rate of 6.0% and a member contribution rate of 6.4% for fiscal years 2005, 2006, and 2007. The State of Texas contributes 6.0% of all employees' eligible gross earnings except for those District employees subject to statutory minimum requirements and those employees being paid from and participating in federally funded programs. The statutory minimum requirements are based on the State of Texas teacher schedule and then adjusted based on cost of education index. For employees funded by federal programs, the federal programs are required to contribute 7.0%.

Contribution requirements are not actuarially determined, but are legally established each biennium pursuant to the following state funding policy. (1) The state constitution requires the legislature to establish a member contribution rate of not less than 6% of the member's annual compensation and a state contribution rate of not less than 6% of the member's annual compensation rate and not more than 10% of the aggregate annual compensation of all members of the system during the fiscal year. (2) A state statute prohibits benefit improvements or contribution reductions, if, as a result of the particular actions, the time required to amortize TRS's unfunded actuarial liabilities would be increased to a period that exceeds 31 years or, if the amortization period exceeds 31 years, the period would be increased by such action.

Contributions Made

Contributions made by the State, District, and employees, and the District's annual covered payroll for the years ended August 31, 2005, 2006, and 2007 are as follows:

Pension Fiscal Year	State TRS Contributions Made on Behalf of the District	District Required Contributions to TRS	Percentage of Total Payroll Contributed by District	Employees' Contributions to TRS	District's Annual Covered Payroll
2005	\$ 13,004,676	\$ 1,475,587	0.65%	\$ 14,469,819	\$226,092,193
2006	12,013,736	2,592,327	1.08%	15,366,624	240,104,624
2007	15,277,309	2,694,957	1.05%	16,419,542	256,554,831

The contributions made by the State on behalf of the District have been recorded in the financial statements of the District as both state revenues and payroll expenditures. These contributions are the legal responsibility of the State.

TRS issues a publicly available financial report that includes financial statements and required supplementary information for the defined benefit pension plan. That report may be obtained by writing to the TRS Communications Department, 1000 Red River Street, Austin, Texas 78701, by calling the TRS

Alief Independent School District

Note 12 – Retirement Plan (continued)

Communications Department at 1-800-223-8778, or by downloading the report on the TRS Internet website, www.trs.state.tx.us, under the TRS Publications heading.

Note 13 – Risk Management

The District is exposed to various risks related to torts: theft of, damage to, and destruction of assets; errors and omissions; and natural disasters. The District’s risk management program encompasses various means of protecting the District against loss by obtaining property, casualty, and liability coverage through commercial insurance carriers, self-insurance, and from participation in a risk pool. The District’s participation in the risk pool is limited to paying premiums for its general liability insurance coverage. There has not been any significant reduction in coverage from that of the previous year.

The District provides health benefits to its employees and dependents through a self-funded employee health benefit plan which is accounted for in the Health Insurance Internal Service Fund. This fund is principally supported by contributions from the District and the employees. The District makes contributions to cover the majority of the premiums for employees, and the employees are required to make contributions to cover the remaining employee costs and their dependents. The Internal Service Fund charges the General Fund premiums for the District’s contribution. A third party administrator acting on behalf of the District processes health claim payments. The District has obtained excess loss insurance which limits the District’s claims paid to \$200,000 annually for any individual occurrence.

The District also provides workers’ compensation to employees through a self-insured plan which is accounted for in the Workers’ Compensation Internal Service Fund. The Internal Service Fund charges the General Fund premiums for the District’s contribution. The District has obtained excess loss insurance which limits the District’s claims paid to \$200,000 for any individual occurrence.

Settled claims have not exceeded insurance coverages in any of the previous three fiscal years. Estimates of claims payable and of claims incurred, but not reported at August 31, 2007, are reflected as accrued expenses of the Fund. The liabilities include an amount for claims that have been incurred but were not reported until after August 31, 2007. The liability reported in the fund is one of the requirements of Governmental Accounting Standards Board Statement No. 10, which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred as of the date of the financial statements, and the amount of the loss can be reasonable estimated. Because actual claims liabilities depend on such complex factors as inflation, changes in legal requirements, and damage awards, the process used in computing claims liability is an estimate based on historical claims. Analysis of claims liability for the fiscal year 2007 is as follows:

	Health Insurance		Workers' Compensation	
	2007	2006	2007	2006
Accrual, September 1	\$ 3,006,068	\$ 2,366,602	\$ 926,575	\$ 440,079
Current year estimates	25,548,235	23,939,073	684,564	1,825,047
Payments for claims	25,217,652	23,299,607	675,750	1,338,551
Accrual, August 31	<u>\$ 3,336,651</u>	<u>\$ 3,006,068</u>	<u>\$ 935,389</u>	<u>\$ 926,575</u>

The following year-by-year exposure details the number of annual workers compensation claims.

1997-98	327	2002-03	431
1998-99	303	2003-04	385
1999-00	336	2004-05	381
2000-01	357	2005-06	342
2001-02	336	2006-07	383
		Ten year average	358

Alief Independent School District
Notes to the Basic Financial Statements

Note 14 – Compensated Absences

The District has a vacation policy for noncontractual employees (administration and other full-time employees) whereby eligible employees receive vacation pay from one to twenty-five days, dependent upon the number of years of service, after the completion of a year's service in the District. All vacation days must be used within an eighteen-month period from the first day of July of each year, and unused vacation pay cannot be carried over to future periods. The liability for unused vacation days at August 31, 2007 is \$1,602,025 and is included in the long-term liabilities on the Government-Wide Statement of Net Assets.

The District's sick leave policy is coordinated with a state mandated sick leave policy whereby substantially all full-time teaching and paraprofessional employees received up to thirteen days sick leave per year. State sick leave days accrue at the rate of five per year without limit to accumulation. The unused balance may be transferred to another District within the Texas public school system. All state sick leave days must be used prior to retirement from the Texas public school system to receive the benefit. The District pays for all state sick leave days used.

Additional local sick leave of up to eight days per year accrues to employees eligible to receive state mandated sick days. All employees not eligible for state mandated sick days may receive up to thirteen days of local leave. Local sick leave may be accumulated without limitation; however, the District does not pay accumulated local sick leave upon termination with the District. Employees are eligible to receive payment for local sick leave (up to a maximum of 80 days) upon qualified retirement from the District, dependent upon the number of years of service with the District. The liability for estimated amounts earned by District employees meeting the requirement for compensation is \$3,607,392 at August 31, 2007, all of which is reported in the non-current liabilities on the Government-Wide Statements. Of this amount, \$360,000 is recorded in the General Fund on the Fund Financial Statements, which represents the portion due and payable from current financial resources.

Note 15 – Fund Equity

A summary of reserved and designated fund balance, as of August, 31, 2007, for all Governmental Fund Types follows:

	<u>General</u>	<u>Special Revenue Fund</u>	<u>Debt Service</u>	<u>Capital Projects</u>
Reserved:				
Inventories	\$ 1,078,050	\$ 518,027		
Debt Service			\$ 3,617,483	
Encumbrances	2,111,980	27,905		
Food Service		4,990,959		
	<u>\$ 3,190,030</u>	<u>\$ 5,536,891</u>	<u>\$ 3,617,483</u>	
Designated:				
Construction				\$ 23,164,609
Other	4,500,000			
Total	<u>\$ 7,690,030</u>			<u>\$ 23,164,609</u>

Note 16 – Litigation and Contingencies

From time to time the District is a defendant in legal proceedings relating to its operations as a school district. In the best judgment of the District's management, the outcome of any present legal proceedings will not have any adverse material effect on the accompanying financial statements.

Alief Independent School District
Notes to the Basic Financial Statements

Note 17 – Arbitrage

In accordance with the provisions of Section 148(f) of the Internal Revenue Code of 1986, as amended, bonds must satisfy certain arbitrage rebate requirements. Positive arbitrage is the excess of (1) the amount earned on investments purchased with bond proceeds over (2) the amount that such investments would have earned had such investments been invested at a rate equal to the yield on the bond issue. In order to comply with the arbitrage rebate requirements, positive arbitrage must be paid to the U.S. Treasury at the end of each five year anniversary date of the bond issue. The District has an estimated liability of \$85,188 for arbitrage as of August 31, 2007. It is not recorded on the District's balance sheet because it is still subject to change on the five year anniversary date of the bond issue.

Note 18 – Related Party Transactions

There was one board member employed by a district vendor during the fiscal year 2006-07. The total vendor payment made indirectly by the District through the architect on the project for work on Elementary No. 24 totaled \$129,364.

Note 19 – Shared Service Arrangement

The District participates in a Shared Service Arrangement (SSA) for deaf education services with eleven other school districts. Approximately 36% of the students served by the SSA are attributable to the District. The District does not account for revenues or expenditures of this program and does not disclose them in these financial statements. However, intergovernmental charges in the General Fund include payments to the fiscal agent for the District's share of project deficits. The District neither has a joint ownership interest in fixed assets purchased by the fiscal agent, Fort Bend ISD, nor does the District have a net equity interest in the fiscal agent.

The fiscal agent is neither accumulating significant financial resources nor fiscal exigencies that would give rise to a future additional benefit or burden to Alief ISD. The fiscal agent manager is responsible for all financial activities of the SSA. Shared Service Arrangement expenditures of \$337,042 were attributable to Alief ISD participation.

Note 20 – Juvenile Justice Alternative Education Program

The District is required by law to participate in a Juvenile Justice Alternative Education Program (JJAEP) in coordination with the county juvenile board. A JJAEP is mandated by Chapter 37 of the Texas Education Code to provide education for certain expelled and adjudicated youth based on standards of academic accountability and performance as approved by the Texas Juvenile Probation Commission. The District paid \$274,924 to place students in a JJAEP in 2006-07.

Alief Independent School District
Notes to Required Supplementary Information

Note 1 - Summary of Significant Accounting Policies

A. Stewardship, Compliance, and Accountability

Each school district in Texas is required by law to annually prepare a budget of anticipated revenues and expenditures for certain Governmental Fund Types for the fiscal year beginning September 1. The District adopts an "appropriated budget" on a basis consistent with GAAP for the General Fund, the Food Service Program that is included in the Special Revenue Fund, and the Debt Service Fund. The District is required to present original adopted and final amended budgeted revenues and expenditures for each of these funds. The District compares the final amended budget to actual revenues and expenditures. The General Fund budget report and the Food Service Program budget report appear in Exhibit F-1 and F-2 respectively, and the Debt Service Fund budget report is in Exhibit I-1.

The official school budget was prepared for adoption by August 29, 2006, as required. The budget was formally adopted by the Board of Trustees at a duly advertised public meeting prior to the expenditure of funds. Final priorities and funding of projects are determined by the Board, which subsequently established a local property tax rate sufficient to support the approved budget.

The administration performs budget reviews by which budget requirements are reevaluated and revisions are recommended to the Board.

The Board is required to approve amendments to the budget that change any fund or functional expenditure category (the legal level of compliance), revenue object accounts, or other financing sources/uses as defined by the Agency for each individual fund type. Unexpended appropriations lapse at year-end. Deficit fund balances are prohibited by state law.

Encumbrance accounting, under which purchase orders, contracts, and other commitments are recorded in order to reserve that portion of the applicable appropriation, is used in all governmental funds. Encumbrances outstanding at year-end are commitments that do not constitute expenditures or liabilities, but are reported as reservation of fund balances. Since appropriations lapse at the end of each year, outstanding encumbrances are appropriately provided for in the subsequent fiscal year's budget to provide for the liquidation of the prior commitments.

End of year outstanding encumbrances that were provided for in the subsequent year's budget are presented as below:

General Fund	\$ 2,111,980
Special Revenue Fund	27,905
	<u>\$ 2,139,885</u>

A reservation of fund balance equal to the outstanding encumbrances at year end is provided for at August 31, 2007.

Internal Service Funds

Internal Service Funds are used to account for the operations of the District's self-funded insurance programs.

Workers' Compensation Fund – This fund is used to account for the operations of the District's self-funded workers' compensation plan, which is supported by employer contributions. Expenses include benefit payments to employees, excess loss insurance premiums, and related administrative costs.

Health Insurance Fund – This fund is used to account for the operations of the District's medical and dental insurance program, which is supported by both employee and employer contributions. Expenses include claims, excess loss insurance, and related administrative costs.

Exhibit I-4

**Fund Balance and Cash Flow Calculation Worksheet (Unaudited) -
General Fund**

August 31, 2007

1. Total General Fund Balance as of August 31, 2007		<u>\$ 78,838,307</u>
2. Total General Fund Reserved Fund Balance	<u>3,190,030</u>	
3. Total General Fund Designated Fund Balance	<u>4,500,000</u>	
4. Estimated amount needed to cover fall (9/1/07 - 1/30/08) cash flow deficits in the General Fund (Net borrowed funds and funds representing deferred revenues)	<u>45,000,000</u>	
5. Estimate of one month's average cash disbursements during the regular school session 9/1/07 - 5/31/08	<u>27,500,000</u>	
6. Estimate of delayed payments from state sources (58XX) including August payment delays	<u>25,136,377</u>	
7. Estimate of overpayment from state sources equal to variance between Legislative Payment Estimate (LPE) and District Planning Estimate (DPE) or District's calculated earned state aid amount	<u>(26,997,664)</u>	
8. Estimate of delayed payments from federal sources (59XX)	<u>1,875,337</u>	
9. Estimate of expenditures to be reimbursed to General Fund from Capital Projects Fund (uses of General Fund cash after bond referendum and prior to issuance of bonds)	<u>500,000</u>	
10. Optimum Fund Balance and Cash Flow (sum of lines 2 through 9)		<u>80,704,080</u>
11. Excess (Deficit) Net Undesignated, Unreserved General Fund - Fund Balance (Line 1 minus Line 10)		<u>\$ (1,865,773)</u>
