

August 13, 2019

Hello to all Alief ISD Team Members,

As each of you continue getting ready to welcome students back to school tomorrow, please allow me to express my sincere appreciation to every Alief ISD Team member for preparing for the 2019-2020 school year in a professional manner. As I look back on the 2018-2019 school year and the successes Alief ISD students and staff experienced, one thing that stands out to me is how each staff member approached the challenges in such a professional manner. I have never been prouder of our district than I was watching each campus raise the standards and expectations for students with a professional attitude and work ethic.

As we begin the 2019-2020 year, I encourage each of you to approach this school year “one day at a time.” We have 177 days of school this year and a professional will approach each day with the same sense of urgency and relentless pursuit of success for our students. In other words, a pro does not waste a single day. I encourage each of you to wake up each morning with the expectation that you will have a great day...for that day. Nothing more. Nothing less. If you can do that, you will realize that a few great days will turn into great weeks, then great months and then before you know, it, you have had a great year. More importantly, our students will have had the honor of being served by true professionals and, in turn, they will have a great year.

On behalf of the Alief ISD School Board (Ann Williams, Darlene Breaux, Lily Truong, Jennifer Key, Rick Moreno, John Nguyen and Natasha Butler) and myself, please accept our most sincere appreciation for what you will do for our students during the 2019-2020 school year.

Have a great day tomorrow! Then have another great day on Thursday and then on Friday. Guess what? You will have had a great week.

See you around!

HD Chambers  
Superintendent
